

REGULATORY ASSISTANCE

Trinity Consultants Federal Funding Services

Founded in 1974, Trinity Consultants helps organizations overcome complex, mission-critical challenges in EHS, engineering, and science through expertise in consulting, technology, training, and staffing. We support clients in geographies worldwide and across a broad range of sectors including energy, manufacturing, mining, steel and chemical.

Secure the Funding You Need to Achieve Compliant Growth Now

Funding Opportunities Abound

Federal agencies, such as the Department of Energy (DOE), issue funding opportunity announcements (FOAs) which are defined by legislation and Federal agency policies. These opportunities often represent millions and sometimes billions of dollars in marketplace investments by the government to achieve administrative goals.

However, the task of securing Federal funding can be frustrating, tedious, and extremely time-consuming, usually requiring hours of intense technical data collection and reportage.

Many industrial firms do not possess the expertise to compile the information required for application, much less secure the funding and remain compliant throughout the contract terms.

There's really no reason your organization should be left out of contention. If you are aware of a Federal funding opportunity in your particular sector – including chemical manufacturing, steel, cement, pulp and paper, automotive, aerospace, semiconductors, or metals mining – improve your chances of receiving an award. Take a closer look at Trinity Consultants Federal Funding Services.

Trinity FOA Concept Paper and Application Support At-a-Glance

- ▶ Permitting & Safety
 - NEPA, air, water, waste, endangered species, national historical preservation
 - Permitting workflow overview of federal, state, tribal, and local codes, regulations, & permitting
 - Environmental considerations summary
- ▶ Life Cycle Analysis

 - Community Benefits Plan
 - Quality Jobs Plan
 - Diversity, Equity, Inclusion, and Accessibility (DEIA) Plan
 - Justice40 Initiative Plan
 - Community and Stakeholder Engagement Plan

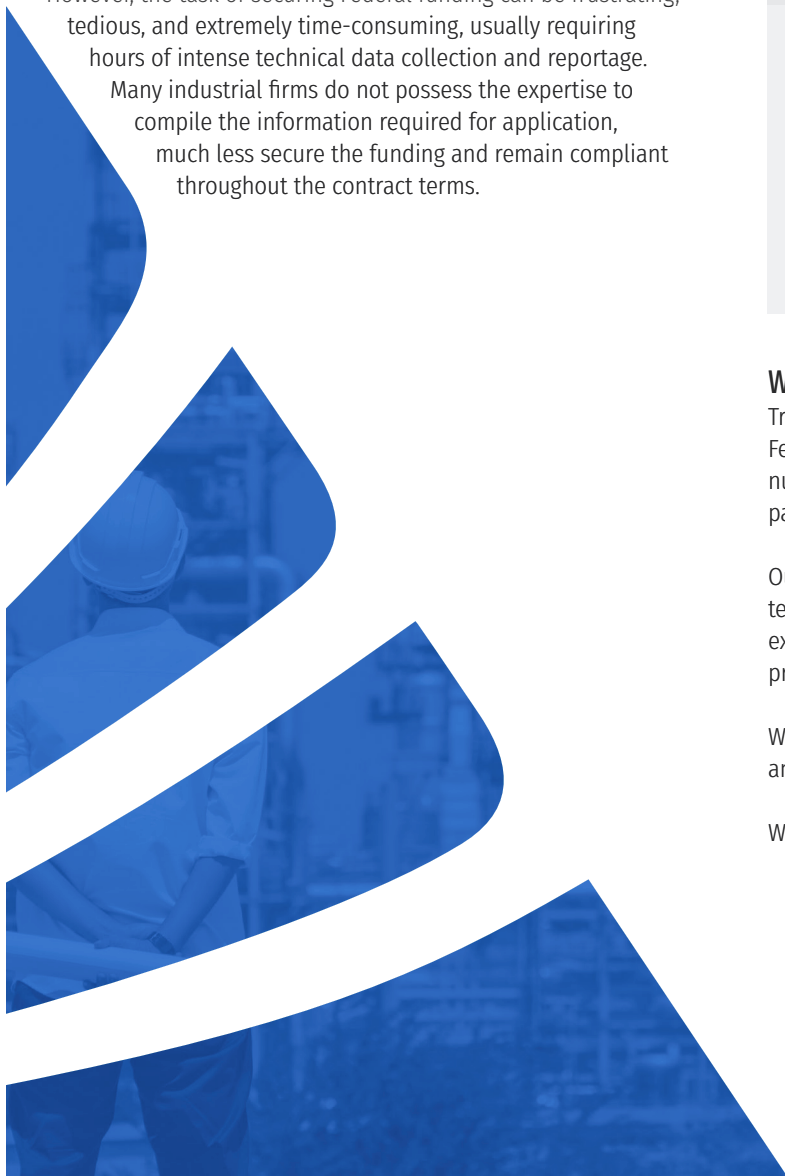

Why Trinity Consultants Federal Funding Services

Trinity Consultants has a long history of helping clients secure Federal dollars. Our Federal Funding Services have unlocked numerous funding opportunities for qualified firms over the past 50 years.

Our proven, data-intensive FOA processes leverage our deep technical knowledge, industry domain expertise, and comprehensive experience in addressing complex environmental matters to achieve prompt, accurate project delivery.

Why not navigate the process with less stress, greater assurance, and speed?

Why not talk to Trinity?

For nearly 50 years, Trinity has helped clients in complex and unique NEPA and permitting efforts across various FOAs such as:

- ▶ Department of Commerce CHIPS Office Notice of Funding Opportunities (NOFO)
- ▶ DE-FOA-0002936 – Industrial Decarbonization (\$6B)
- ▶ DE-FOA-0002962 – Carbon Capture Demonstration Projects (\$1.7B)
- ▶ DE-FOA-0002779 – Regional Clean Hydrogen Hubs (\$7B)
- ▶ DE-FOA-0002730 – CO2 Transport, Front-End Engineering Design (\$92M)
- ▶ CHIPS and Science Act – (\$50B)

Additional funding opportunities that extend beyond FOAs include:

- ▶ 48C Tax Credit Program – Investing in Energy Communities
- ▶ DOE Industrial Efficiency and Decarbonization Office
- ▶ DOE Technology Commercialization Fund
- ▶ DOE Loan Programs Office

Your Proven Partner for FOA Applications, Submissions, and Contract Management Count on Trinity Federal Funding Services to Help You Qualify for Federal Funding

Trinity's experience in environmental permitting, National Environmental Policy Act (NEPA) projects, carbon life cycle assessments, and community benefits planning positions us as your go-to resource for closing the loop on FOA applications – especially under short notice. Our FOA concept paper and application services include:

Environmental Permitting

Trinity can identify all applicable Federal, State, local, and Tribal laws and regulations, including the Clean Air Act and Clean Water Act, to develop the necessary applications to obtain construction and operating permits for your proposed project.

NEPA Services

Trinity can develop an Environmental Assessment (EA), Environmental Impact Statement (EIS), or Categorical Exclusion (CX). If an EA or EIS is required, Trinity will identify the following impacts from the proposed project, including:

- ▶ Biological impacts to wildlife, plants
- ▶ Cultural impacts to archaeological and cultural resources
- ▶ Impacts to environmental media
- ▶ Noise and visual impacts
- ▶ Social and economic impacts
- ▶ Traffic and land use impacts

Life Cycle Assessment

Life Cycle Assessments (LCAs) clarify and quantify the environmental impacts associated with organizational operations across the value chain. Trinity can help you:

- ▶ Define the goal and appropriate scope of the assessment
- ▶ Identify appropriate environmental metrics

- ▶ Collect and calculate data
- ▶ Effectively evaluating and presenting the results of the assessments

Trinity can also help you establish the carbon footprint of your products/supply chain for the purposes of reporting climate change impact to shareholders and stakeholders through company websites, annual reports, and voluntary registries (such as CDP).

Community Benefits Plans

A Community Benefits Plan is an agreement signed by community groups or coalitions and a project developer, identifying the community or labor benefits a developer brings to a project. Trinity can support the development of strategies and methods of accountability for Community Benefits Plan elements, including community and labor engagement; diversity, equity, inclusion, and accessibility (DEIA); greatest benefit for the greatest number; investing in the American Workforce; and furthering the Justice40 initiative.

Recent Trinity Consultants DOE FOA Projects

- ▶ Carbon capture FOA application for large independent wholesale power company in North America.
- ▶ Carbon capture FOA application for gas-fired power project in U.S. Southwest.
- ▶ Regional clean hydrogen hub concept paper for publicly traded resources and energy infrastructure company.
- ▶ Carbon capture permitting for gas-fired electricity generating unit in U.S. Southwest.

Why Choose Trinity

Trinity's knowledge and expertise across a wide range of environmental sectors make us an excellent partner to help your facility develop the necessary components for an effective Federal FOA response. Meet your deadlines, fulfill compliance standards, and support rapid business growth with the help of government funding. Take your business to the next level with confidence. Contact Trinity Consultants and advance your program toward success.

To ensure a prompt response, please contact David Strohm at 208.999.2327 or Brian Burdorf at 214.403.8282 or visit trinityconsultants.com now.
