

# REGULATORY ASSISTANCE

## EHS Consulting for Virginia Industry

Founded in 1974, Trinity Consultants helps organizations overcome complex, mission-critical challenges in EHS, engineering, and science through expertise in consulting, technology, training, and staffing. We support clients in geographies worldwide and across a broad range of sectors including industrial, energy, manufacturing, mining, life sciences, and commercial/institutional.

For over 45 years, Trinity has focused on providing unparalleled environmental consulting services in the areas of permitting and compliance, regulatory applicability analyses, and environmental impact assessments.

Trinity established a Roanoke office in 2008 to better serve our EPA Region 3 clients, and our regional business has grown steadily since then. Trinity is recognized as a leader in environmental consulting services to industries in Virginia.

Trinity's technical staff are some of the industry's most experienced environmental professionals, with particular focus in requirements under the Clean Air Act. This is in direct contrast to many larger engineering consulting firms that sell their large resource base, while less than 1% of their staff have air quality responsibilities. Our company-wide focus and dedication to environmental permitting and compliance

gives us an unparalleled level of collaboration, experience, knowledge, and efficiency. This allows us to deliver the right solutions that are tailored to meet each of our client's needs at a competitive cost.

Our geographical presence allows us to bring experience and ideas to the table that firms that are limited to one state simply cannot provide. Trinity is not limited to the ideas and challenges of a single state, but offers robust solutions based on the national forefront of environmental permitting and compliance strategy. Furthermore, by maintaining local offices with staff intimately engaging with state and local agencies, Trinity offers national experience that is tailored to your local area.

Trinity serves a very broad cross-section of industries with various environmental multimedia needs. With direct experience serving Virginia based facilities, Trinity capitalizes on our diverse project exposure to bring insight and strategy to environmental compliance for these facilities.

### Trinity's Services

Trinity provides broad environmental permitting and compliance assistance to our clients. Highlighted below are our key areas of expertise. We pride ourselves in providing high quality and cost-competitive compliance solutions to our Virginia clients.

#### Air Quality Permitting

Trinity's air quality permitting experience is unmatched in all aspects including Prevention of Significant Deterioration (PSD) permitting, Title V permitting, state construction and operation permits, emissions calculations, regulatory applicability analysis, state and federal Best Available Control Technology (BACT) assessments, air dispersion modeling, and permit application preparation. Trinity works closely with the client to develop an optimal permitting strategy and helps them achieve their goals of maximum operational flexibility. When a permit is not required, Trinity assists in documenting non-applicability for the client's files or submitting formal exemption requests to the commonwealth. Trinity tracks progress of the permit application through the review process, and responds to agency questions in a timely fashion.

Trinity is a premier dispersion modeling firm that provides a wide range of air quality modeling consulting services for regulatory applications, emergency planning, and human health assessments. Trinity has developed numerous tools to aid in identifying subtle anomalies in modeled results, which can often be challenged in a regulatory context.

## EHS Auditing

Trinity is respected for our skills in evaluating compliance with regulatory requirements and conformance with management system processes and practices. Trinity is ideally suited to conduct effective compliance audits to ensure that all applicable regulations are properly addressed, determine compliance status, and suggest corrective action. Trinity provides a full range of audit services from the site level to corporate level. Trinity partners with the client at every step, beginning with audit planning and implementation and ending with closure of corrective action items.

## Compliance Reporting

Trinity routinely assists clients with recurring compliance obligations by ensuring information is submitted in an accurate and timely fashion. Trinity is accustomed to reviewing on-site records and related process information, including detailed CEMS data to assist in documentation and assessment of compliance. Trinity develops site-specific tools and procedures that can be used for future reporting to minimize compliance burden. Trinity recommends and assists with the implementation of enterprise EHS management information systems to assist a facility in task tracking, monitoring of key performance indicators, and report preparation.

## Multimedia Environmental Services

Trinity assists with multimedia regulatory requirements including (but not limited to): wastewater permitting (VPDES, indirect discharges), water management plan (SPCC, SWP3, BMP) development and training, stormwater planning and management, wetlands and waters of the U.S. jurisdictional determinations, CWA Section 316b and Section 404 permits, solid waste management, hazardous waste determinations and reports, EPCRA (Section 312 and 313) reporting, RCRA training, RMP audits and plan preparation, LDAR management, due diligence for mergers and acquisitions, and noise monitoring and modeling.

## Professional EHS Training

Trinity assists with multimedia regulatory requirements including (but not limited to): wastewater permitting (VPDES, indirect discharges), water management plan (SPCC, SWP3, BMP) development and training, stormwater planning and management, wetlands and waters of the US jurisdictional determinations, CWA Section 316b and Section 404 permits, solid waste management, hazardous waste determinations and reports, EPCRA (Section 312 and 313) reporting, RCRA training, RMP audits and plan preparation, LDAR management, due diligence for mergers and acquisitions, and noise monitoring and modeling.

## Partnering with Trinity

Trinity's Virginia clients are served by experienced consulting professionals to ensure that each project leverages the most current regulatory expertise. Our consultants are well respected by commonwealth and federal environmental agencies and are allied with top tier environmental attorneys and service providers. Whatever your environmental challenge, Trinity has the experience and insight to provide intelligent solutions to optimize environmental performance.

## Trinity in Virginia

- ▶ Trinity hires talented professionals with engineering and meteorological backgrounds with advanced degrees and professional certifications. This talented and experienced staff brings nationwide expertise, diverse insight, and ideas to the state in order to assist clients to strategically plan for what's next in Virginia.
- ▶ Trinity hires talented professionals with engineering and meteorological backgrounds with advanced degrees and professional certifications. This talented and experienced staff brings nationwide expertise, diverse insight, and ideas to the state in order to assist clients to strategically plan for what's next in Virginia.
- ▶ With staff conveniently located in Roanoke, Trinity offers a high-level of responsiveness for same-day on-site service.
- ▶ Trinity has established professional relationships with Virginia's key state regulators and has experience working in all regional offices. Trinity is highly respected by the state regulators due to their proficiency with the commonwealth's permitting process and professionalism.
- ▶ Trinity is a member of the Virginia Manufacturer's Association (VMA) and is active in their Air Subcommittee group where they review and comment on proposed regulations with Virginia industries.
- ▶ Trinity has nationwide experience and knowledge of new regulations and continuously shares our expertise with industries. Other firms with small air quality groups or limited exposure cannot offer the same level of analysis in a timely fashion.
- ▶ Trinity's national and commonwealth-specific experience in permitting Virginia's industrial clients gives Trinity a deep understanding of the needs and effort required to obtain permits for new capital projects.
